2014-15 NATIONAL ALCOHOL SURVEY (N13)

v. 7/30/14

NOTE: This is the current working draft. Items consistent with N12 and prior surveys should have the same item numbers as on the earlier instruments, although items have been moved around quite a bit. Asterisks denote items that are new (**) or substantially edited (*) from prior versions. The response options for some items have been modified; most of these are indicated with a plus sign (+).

SPECIAL BLOCK, ANSWERING MACHINE AND PRIVACY MANAGERS

Special Block - FAQ

IF CALLTYPE=1,2

1. How did you get my phone number? It's unlisted.
2. I don't know anything about that.
3. Why should I participate?
4. Why do you need to know how many adults live in the household?
5. I don't do surveys over the phone. Put it in the mail.
6. I don't have anything to do with public programs. I get my health care from my private doctor/ HMO/ military.
7. Respondent is concerned about confidentiality
8. I don't have time for a 45 minute survey

1. How did you get my phone number? It's unlisted.

- The computer dials telephone numbers at random, after we provide the area code and the first 3 digits of the area in the country we are trying to reach. The computer then dials the last four digits at random. We get all kinds of numbers: fire stations, real estate offices, pay phones, etc. The computer can dial an unlisted number as a matter of pure chance. The study is confidential.

2. *I don't know anything about that.*

- This isn't a test. We only want to ask about health and health practices that affect your health. Many people find the survey to be interesting.

3. *Why should I participate?*

- This data will be used to improve health programs and prevent diseases. Participating is one way for you to be represented at the state and federal level. The information is used for planning purposes at all levels of government to develop more effective health programs.

- For one thing, this has to do with how lawmakers spend taxpayer dollars, and putting resources into programs that benefit the most people and do the most good.

- The more people we have participating the more accurate the results will be. When you don't participate, it leaves a "hole" in the data.

4. *Why do you need to know how many adults live in the household?*

- Our survey protocols require that we select one adult from your household. We ask for the number of men and the number of women, and then the computer randomly selects one person. That way we can be sure that the study represents men, women, young, old, healthy, in poor health, etc.

5. *I don't do surveys over the phone. Put it in the mail.*

- We can only conduct this survey over the phone. After years of experience conducting these surveys, the Public Health Institute believes that this is the most efficient, representative, and thorough method of gathering this information. Many people like you have participated in this survey, and many find it interesting. You can refuse to answer specific questions.

6. *I don't have anything to do with public programs. I get my health care from my private doctor/ HMO/ military.*

- All health care providers, public or private, can use the information to improve services, give better advice, and plan better programs.

7. *Respondent is concerned about confidentiality*

The NAS contains sensitive questions and information. It is natural and understandable that respondents will question where the data is going and how it will be used. When a respondent asks questions about confidentiality, be prepared with an explanation. Take enough time; don't rush the explanation. Mention these points:

- No information that can identify you is ever used in a NAS report, or given to anyone.
- The data is only reported in aggregate, or group, form.
- Any identifying information, such as a telephone number, is separated from your responses once the data have been collected and compiled.
- As an interviewer, you have signed a confidentiality agreement as a condition of employment, and are not allowed to discuss this study or any study with anyone outside the call-room and outside of work-related conversations.

8. *I don't have time for a 45 minute survey*

- I understand you may not have time to complete the survey at this time. You can start the survey now and finish it at another time that is convenient for you.

- We can begin now and you can let me know when you have to go. We can then finish it at a later time.

- For cell: I understand you are concerned about the cost of minutes. If you have free weekend or evening minutes, we can schedule a callback for that time. You can complete the survey in segments, if you don't have enough time to complete it at once.

Participation in the study involves answering questions about health related issues such as the experience of injuries, violence, and some background questions such as your age and marital status. We are also interested in your attitudes, opinions and use of alcohol and drugs even if you do not drink alcoholic beverages or use drugs. Your participation provides important information for treatment and policy on health-related issues. Participation is voluntary. If any questions make you uncomfortable just tell me and we can move on to the next one; you can postpone or end the interview at any time with no penalty.

All of your answers to questions will be confidential. Your answers will be grouped with those of all the other participants. Any answers given will not be linked with any personal identifying information. INTERVIEWER OBSERVATIONS. THIS SECTION IS TO BE COMPLETED AFTER YOU CONDUCT THE INTERVIEW AND AFTER YOU HAVE HUNG UP WITH THE RESPONDENT.

Z1　　OVERALL, HOW COOPERATIVE WAS THE RESPONDENT DURING THIS INTERVIEW?
　　　　01　　VERY COOPERATIVE
　　　　02　　SOMEWHAT COOPERATIVE
　　　　03　　SOMEWHAT UNCOOPERATIVE
　　　　04　　VERY UNCOOPERATIVE

Z3　　OVERALL, IS THIS INTERVIEW OF QUESTIONABLE QUALITY, GENERALLY ADEQUATE OR OF HIGH QUALITY?

Questionable Quality: SR was severely distracted; SR was trying to get through the survey to get the incentive; SR was giving outrageous answers and not being honest; sound quality was very poor.

Generally Adequate: typical interview; may need to repeat a few lists, but the SR is generally attentive and only minimally distracted, providing honest answers; there were no communication barriers or sound quality issues.

High Quality: exceptional interview with an attentive and engaged SR; no communication issues or sound quality issues; minimal probing.
